## CONTENTS

# THE VEHICLE THAT KNOWS NO BOUNDARIES

The Nissan Patrol is a compelling package of muscle and sophistication, combining legendary power, superior comfort and authentic off-road capability.

Imposing looks and bold styling make a big impression outside, while high standards of refinement and luxury are found inside.

Unstoppable power and torque allows you to get into and out of tough terrain with ease, bringing a satisfying new perspective to all your pursuits.

Experience it. Push boundaries and shift the limits of off-road adventure. No hesitation.

# PICK A DESTINATION. ANY DESTINATION

When the going gets tough, get going in a Nissan Patrol. Climb a 39 degree gradient. Wade through 700mm of water. Taking the rough with the smooth, the Nissan Patrol's all steel body on a strong ladder frame chassis, highly articulated suspension and flexible four-wheel drive system make it relentless. On-road and off.

Its superior handling is enhanced with all-round, multi-link suspension, which provides reassuring high-speed stability with a calm and supple ride on-road. Heavy-duty coil springs smooth out the bumps and boulders for excellent durability and ride comfort. Add telescopic front and rear shock absorbers and stabiliser bars for

improved cornering, and you get the confidence that comes with authentic off-road power and performance.

The Anti-lock Braking System (ABS) detects what sort of surface the Nissan Patrol is on, and automatically adjusts itself to best handle the situation should you have to brake suddenly. What's more, the actual construction of the Nissan Patrol is geared towards safety and ride comfort – whatever the ride. With a low centre of gravity, solid axles, a proven wheelbase, responsive steering and a surprisingly tight turning circle, driving the Nissan Patrol is a comfortable experience, whatever the terrain.

# TOUGHING IT SHOULDN'T MEAN ROUGHING IT

THE PERSON NAMED IN

Not everything about the Nissan Patrol is rugged and tough. In fact, climb inside and you'll find a refreshing degree of luxury.

A two-tone finish complements the curvy dashboard, with a 4 dial instrument panel that's easy to read at a glance. The seats have been redesigned to provide greater comfort and support. Revel in the indulgence of leather trim, brushed aluminium dial surrounds and a classic woodgrain effect. All passenger-facing surfaces incorporate soft-feel material, which enhances the luxury of the cabin. Add electrically powered front seats, automatic front and rear climate control, in-dash Radio/CD, cruise control and a sunroof, and you get an interior that'll take you through the harshest terrain in style.

Space and seating were designed with comfort and adaptability firmly in mind. With up to 2 226 litres to swallow whatever equipment or luggage you may need, load space is something you'll never have to worry about again. Then there's the highly adjustable rear seat configuration – seven seats, three rows, split, reclining, folding... armrests, cupholders, and deep door pockets cater for your family's every need and comfort.

## SAFETY

#### A Heritage of Advancing Safety

When you climb into your Nissan Patrol, you can be rest assured that everything from the body to the headlights has been designed with your safety in mind.

The legend of the Nissan Patrol has been inspired by the ruggedness of its immensely strong, separate ladder chassis, all-steel body with extended and reinforced crumple zones and steel anti-intrusion bars. The entire framework of your Nissan Patrol is designed to reduce the effect of primary and secondary impact.

#### **Four Ventilated Brake Discs**

Apart from the framework of your vehicle, each Nissan Patrol is fitted with large diameter ventilated brake discs. This allows heat to be dissipated rapidly to improve braking action, diminish brake fade and enhance the life of your brakes.

#### **Illuminated Halogen Headlights**

For improved safety during night driving, illuminated halogen headlights give you reassurance and the extra reaction time that you need to pick out road signs or hazard warnings when you're off the beaten track or navigating an unfamiliar highway.

Safety Shield

In the commitment to "Real World Safety", Nissan pursues innovation as part of its Safety Shield concept. Based on the idea that cars should help protect people, advanced, proactive safety technologies help driver and passengers to avoid danger and injury in a wide range of circumstances. Visit www.nissan.co.za to find out more.

#### COLOURS

adventure. No hesitation.

make the most of each and every opportunity for

#### Nissan's commitment to quality

To provide all customers with a consistently high level of quality, Nissan applies the same standards worldwide, to ensure that all Nissan owners enjoy peace of mind for the lives of their vehicles. The approach is based on quality from the customer's perspective on three key elements: First, the expectation of a smooth driving experience with complete peace of mind. Second, the intangible appeal of a vehicle, its power to captivate and excite, with features that capture attention and imagination. Third, the level of attentiveness and service during the sales process, and long after the sale is concluded.

	ABS (Anti-lock Brake System)		Electronic, 3 channel, 5 sensor	
	Parking brake		Mechanically operated on	Mechanical,
			propeller shaft	on rear axle

Optional equipment can result in an increase/decrease in the unladen weight and consequently affect the payload.

Quoted payloads have been determined to allow for factory options or aftermarket solutions that are not accommodated in the standard delivery and services scope. The calculation of the actual payload of a vehicle is the difference between the gross vehicle mass and the curb mass and can only be determined by weighing the vehicle. Due to production tolerances/tyre sizes/type of running gear, the actual dimensions can differ slightly from the figures supplied in this brochure.

Nissan's commitment to the environment

Nissan's environmental philosophy embraces people, vehicles and nature. In the pursuit of a sustainable mobile society, the Nissan Green Program aims to reduce the environmental impact of Nissan vehicles at every stage of the vehicle life cycle, while corporate activities address environmental challenges.

#### ISCLAIMER

Every effort has been made to ensure that the content of this brochure is correct at the time of going to print (April 2015). This brochure has been produced featuring prototype or accessorised vehicles exhibited at motor shows and, in accordance with the company's policy of continuously improving its products, Nissan South Africa reserves the right to change the specification and the vehicles described and shown in this brochure at any time. Nissan dealer swill be informed of any such modifications as quickly as possible. Please check with your local Nissan dealer to receive the most up-to-date information. Due to the limitations of the printing processes used, the colours shown in this brochure may differ slightly from the actual colours of the paint and interior trim materials used. All rights reserved. Reproduction in whole or part of this brochure without the written permission from Nissan is forbidden.

Ouoted fuel consumption and emission values have been established using the prescribed method of measurement (United Nations Economic Commission for Europe "ECE" Regulation R101 in the current version) as required under current legislation. This data does not pertain to the specific vehicle and does not comprise part of the offer, but is supplied for the purpose of comparison between the various types of vehicle, in accordance with 1999/94/EC.

Driving behaviour / conditions and other non-technical factors contribute towards a vehicle's fuel consumption and CO<sub>2</sub> emissions over and above the determined fuel efficiency of a vehicle.
